Coders Lab - IT School
Graduated: 2022

MASTER OF ADMINISTRATION

University of Opole
Graduated: 2022

BACHELOR OF ARTS IN INTERNAL SECURITY

Specialization: Economic Security
State Higher Vocational School in Nysa
Graduated: 2015

LANGUAGES

- Polish: Native
- English: B2
- German: A1

BŁAŻEJ BARTOSZEWSKI

FRONTEND DEVELOPER (FULLSTACK-READY)

Frontend-focused developer with fullstack experience, passionate about clean code, UI/UX, and continuous learning. I've contributed to real-world projects like Justfitup, and currently work as a developer at CodeWorlds and on an early-stage startup product. My technical foundation was built through the GoIT Fullstack Developer course, complemented by manual-testing training at Coders Lab and self-driven study of JavaScript, AI-assisted development, and modern frameworks. I'm detail-oriented and curious by nature, and I enjoy solving problems through both code and communication. Outside of coding, I love riding chopper motorcycles, exploring gravel trails, playing volleyball, and discovering new culinary experiences.

WORK EXPERIENCE

DEVELOPER

Confidential Startup (NDA)

2026-Current position

- Integrated third-party services (Twilio, Slack, Notion) to extend product functionality.
- Deployed and managed infrastructure on Vercel.
- Contributing to an early-stage startup product (private repository)

DEVELOPER

CodeWorlds - application for learning programming, with game.

2021-Current position

- Maintenance, minor fixes, enhancements.

[\[Page\]](#)

DEVELOPER

Justfitup - application for trainers, nutritionists and people leading a healthy lifestyle

- Maintenance, minor fixes, enhancements.

[\[Page\]](#)

INSPECTOR

District Office Measures Wrocław

2017-Current position

- Legalization of measuring instruments.
- Inspection and supervision of measuring instruments.
- Ensuring compliance with measurement legislation.

PROJECT EXPERIENCE

ENGLISH LEARN PLATFORM

Technologies : [TypeScript, Next.js, Tailwind CSS, Supabase, Clerk, Google Calendar, 100ms]

A full-stack web app for booking and conducting 1:1 English lessons with a native teacher. Includes role-based dashboards, real-time scheduling synced with Google Calendar, and integrated video calls with chat, mic, and camera controls.

[Repository](#) [Visual page](#)

TASKFLOW

Technologies: [Angular, TypeScript, RxJS, SCSS, Firebase (Firestore, Auth), Vitest]

Task and shopping-list management PWA with a drag-and-drop Kanban board, built with standalone Angular components, Signals-based state, and a Repository Pattern data layer. Installable on Android/iOS, offline-first, with real-time cross-device sync.

[Repository](#) [Visual page](#)

DEVPULS

Technologies : [Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Neon (Postgres), Claude API, Web Push]

Tech-news aggregator that classifies and summarizes articles from 11 sources using the Claude API, sending one digest push notification per run. Built as a monorepo (PWA + scheduled ingestion agent) with deduplication, health monitoring, and documented architecture decisions.
